—The President of the Missouri Press Association, who is himself a democrat, appoints six Democrat editors as representatives to the National Editorial Association. Besides these, three other Democratic editors will be entitled to seats in that body from this state. The members of the national body may conclude there are no other kind of editors in Missouri. There are a few. It only shows how Democrats run such things when they have a chance. Savannah Reporter.

—An exchange puts it thusly: "If you are a farmer, cure the town where you live as the nearest town on earth; talk this to your neighbor; make them believe that the business men are all robbers and thieves. It will make your property more valuable, and you will kill the town. If you are a merchant don't advertise in the home paper but buy a rubber stamp and use that; it may save you a few times and make some one who does advertise prosper and the local paper look as if it were published in a one-horse town."—Fulton Globe.

—Riley McIntyre has purchased the farm of Mr. Colwell, who has purchased the farm of Mrs. James Pollock, of Rising Sun.

—Rev. Sapp preached a sermon for the special benefit of the young ladies of Mound City, last Sunday evening. It was practical and to the point.

—The blackberry crop has been the finest ever raised in the county. J. N. Menifee had nearly 500 bushels, for which he received about 7 cents per quart.

—The family of Mr. Dray arrived at Mound City, last Friday evening. They came from Trigo county, Kansas, and are not favorably impressed with that part of the "Sun-flower" State from which they came.

—John Jordan, who has been out in Colorado for the past three or four months, returned to Mound City last Saturday evening. He seems to be well pleased with the country there, and thinks of returning next spring.

—The shipments of packed pork from the packing centers of the Missouri valley now exceed those from Chicago. In a short time the same will be true of cattle. The packing industries of the valley will yet grow to immense proportions, and the shipments west and south to supply the future mining and manufacturing centers will be greater than the present eastern movements of our farm products.

—The county Normal began its session at Mound City Monday last. If all the teachers of the county will turn out and do three or four weeks' solid work we will have better schools next winter. While the Normal is designed especially for teachers, yet the more advanced pupils throughout the county could find no better schooling than they would at the institute. All the common branches will be reviewed and subjects will be discussed so that all can understand.

—Have you ever counted up the number of rods of fencing on your farm, and figured out the amount of money invested in it and what it costs annually to keep it in repair? If not, do so and you will likely be very greatly surprised. Then see if you cannot plan a better system of husbandry and arrange your fields in better shape and larger size, so as to do away with much of the fencing you now have. No-fence fencing is a waste of labor and capital.

—Auditor Siebert has made a very important ruling in regard to the liability of the state to pay the cost of maintaining boys at the Howellville reform school. Mr. Siebert holds that the counties should bear this expense, and it appears reasonable that he is right. Counties are required to bear pay for the keeping of patients at the various lunatic asylums, and there is enough similarity between the cases in the absence of any law upon the subject to sustain the auditor's ruling.

—A terrible storm visited Woodville, Nebraska, and vicinity on the 15th inst. The former residents of this county suffered some damage. J. F. —Every person in a community owes some consideration to his neighbor. As the ever-widening circles of the water testify to the atom thrown upon the placid surface, so does the prosperity of a community testify to the liberality or penury of its citizens. The citizen who is intent upon gaining wealth at any hazard, and gives no thought to the prosperity of his city or the welfare of his neighbors is an incubator to society and a clog upon the wheels of progress. "No man liveth to himself; and no man dieth to himself." Every community that prospers does so by the public spirit of its citizens, and the town that moves along in the same old rut, forever content with the present condition of things and unwilling to work for the future, is a good community to stay away from. No man has the right to remain inactive when the interests of his community is at stake and thus depreciate the value of the property of his more progressive neighbor. Every citizen owes it as a duty to himself and to his neighbor to do all in his power to enhance the prosperity of his community, and he who refuses to perform this duty should be met on every hand by the condemnation of people who are willing and eager to do their share toward the upbuilding of their vicinity. As a rule every city has its quota of scoundrels who are always a hindrance in the breeding and hatching of a deal weight upon the leaders in the march of progress, and Oregon is no exception to the rule. It is now high time to pause for a moment and give these scoundrels to understand that they must either pull their share of the load or be content with less fodder.
